Mode description

Game mode: There are 3 games in total, short press to switch between different games, namely: remember numbers, find the size, and find the pattern;

"Remember numbers": When the game starts, the numbers will flash on the screen for 3 seconds and then disappear. If the child reproduces the numbers within the specified time, it will be regarded as a success. There are 5 levels in total, with 5 questions in each level, and the difficulty increases;

"Find the size": The screen will randomly display 3 groups of numbers, listen to the questions, and the child finds the largest, smallest, or number within a certain range within the specified time, and the answer is considered successful. There are 6 levels in total, and each level has 5 questions and difficulty increases;

"Looking for the pattern": The screen will randomly display a group of regular numbers. According to the number pattern, the child presses the corresponding pattern number within the specified time, and the answer is considered successful. There are 5 levels in total, 5 questions in each level, and the difficulty increases;

Formula mode: short press to switch formulas; there are addition formulas, subtraction formulas, multiplication formulas, and division formulas;

Timer switch: This function can be turned on after the child has mastered the operation rules. Short press to set the answering time of each question, which are 5 seconds and 10 seconds respectively. After turning on, the child needs to answer the question within a limited time. right or wrong. (Note that short pressing this button is invalid in game mode and formula mode)

If you are in a quiet place such as a library, long press this button to turn off the answering sound effect.
